# Introduction

## **CHANDRA ENGG. & MECH. PVT LTD**

CHANDRA has been a leader in the field of turnkey projects of bulk storages of toxic and inflammable products in India since 1980.

A team of highly experienced and dedicated engineers, backed by the in-house manufacturing and fabrication infrastructure located at Chembur, Mumbai and also at Turbhe and Taloja, Navi Mumbai, ensure that the products manufactured and systems made by CHANDRA meet global standards.

Synonymous with quality and the best standards of technical excellence, CHANDRA serves the broad spectrum of Indian industry including the oil companies (bottling plants & refineries), engineering industry, chemical industry and petrochemical complexes.

CHANDRA recently indigenously developed and started production of Internal Excess Flow Check Valve (IEFCV) for LPG/Propane mobile tank trucks ensuring SAFETY in transportation of these inflammable products. Prestigious projects completed by CHANDRA include a LPG mounded storage for Vikram Sarabhai Space Centre (VSSC) at Thiruvananthapuram for the Hypersonic Wind Tunnel Project.

CHANDRA is the largest indigenous manufacturer of Rail Tank Wagon Safety Fittings for BTPGLN tank wagons for LPG transportation approved by The Research Designs and Standards Organization (RDSO), Ministry of Railways. With products manufactured with global standards, 'CHANDRA' offers products approved and inspected by agencies of global repute, like EIL, RDSO, SGS, American Bureau of Shipping (ABS), IRS and BV.

CHANDRA has worked closely with the Petroleum and Explosives Safety Organization (PESO), Government of India and has its products and services approved by The Chief Controller of Explosives, Nagpur.

CHANDRA tests its products at its own state of the art testing facilities and also at independent testing laboratories, such as Fluid Control Research Institute, Palghat and Indian Institute of Technology, Mumbai.

# Areas of Expertise

- Turnkey projects for storage of LPG/Propane/Ammonia/Amines/Ethylene oxide/Refrigerant gases
- Fabrication of coded pressure vessels
- Design, engineering services and turnkey projects for petroleum storage
- Deodourizing plants for deo and foam applications
- Specialized pressurized industrial storages with twin hulled vessels for toxic chemicals and vessels for refrigerant applications
- Safety fittings for toxic & inflammable products
- Rail tank wagon safety fittings and valves
- Internal excess flow check valves for LPG / Propane
- Pressure regulating and metering stations
- Positive displacement vane pumps
- Vaporizers
- Level gauges for toxic / inflammable products
- Ball valve, Globe valve
- Maintenance and operational support for industrial clients
